

UI-WIREFRAMES.md — PrepGenie

1. User Flow Diagram (Mermaid)

2. Screen Inventory & Purpose

Screen	Route	Purpose
Landing Page	/	Public marketing/intro page; explains value prop, CTA to sign up
Auth Screen	/login, /signup	Email/password + Google OAuth entry point
Dashboard	/dashboard	Home base after login; shows progress charts, quick actions, recent activity
Resume Analyzer	/analyzer	Upload + view AI resume feedback
Role Selection	/interview	Choose interview track before starting
Interview Chat	/interview/:sessionId	Sequential Q&A chat interface
Interview Results	/interview/:sessionId/results	Score breakdown + weak topics after completion
Settings/Profile	/settings	Update target role, name, delete account
404	*	Fallback for invalid routes

4. Navigation Structure

Navbar (persistent, authenticated state):

Logo → /dashboard

Dashboard | Analyzer | Interview | ⚙ Settings | Logout

Unauthenticated Navbar:

Logo → /

Login | Sign Up

- All protected screens redirect to `/login` if unauthenticated (see ARCHITECTURE.md request lifecycle).
- Breadcrumb-free design — flat navigation depth (max 2 levels) keeps UX simple for a 10-day build and easy to demo.

5. Design System Notes (carried into Day 9 polish)

- Primary color: indigo/violet gradient (AI/tech feel)
- Success: green (high scores), Warning: amber (mid scores), Danger: red (low scores) — consistent across ATS gauge and interview bars
- Font: Inter (via Tailwind default stack)
- Card-based layout throughout for consistency between Dashboard, Analyzer, and Results screens
